Dear Customer,

**Start the year off right with a new and easy way to lower your energy bill!**

You're invited to participate in a new energy savings initiative offered by NV Energy. It's called mPowered, and you can **sign up for free** to receive a home energy management system that **helps your air conditioner and heater operate more efficiently**. Considering that 50% of your energy bill goes to cooling or heating your home, the savings can really add up.

Here are a few of the benefits:

- Receive a **FREE** intelligent thermostat (a \$200 value)
- We'll install it for **FREE** (a \$100 value)
- Energy optimization monthly service fee waived (\$10.99/mo)
- Save an average of **10% - 15%** annually on heating and cooling energy costs
- Change your temperature settings on the go from your smartphone or computer

Once your new thermostat is installed, a web-based service will learn your preferences to keep your heating and cooling systems operating at maximum efficiency. Energy savings reports are available through an online portal so you can watch the savings add up. You can save even more and receive rebate credits at the end of the year by participating in Energy Events<sup>1</sup> initiated by NV Energy during the peak summer months.

mPowered offers a solution for home energy management in a way that's more convenient than ever.

To be eligible you need broadband Internet service (DSL or cable), central A/C, and an open port on your Internet router.

Get started now by visiting [NVEnergy.com/mPowered](http://NVEnergy.com/mPowered) or call NV Energy at **(702) 402-2444**.

Be mPowered and enjoy your savings!

Sincerely,

The mPowered Team

---

<sup>1</sup> NV Energy may occasionally increase the set point temperature of your thermostat by up to 4 degrees for 2-4 hours in the summer to conserve energy during times of peak demand. Participation in Energy Events is voluntary and can earn valuable participation credits that can be used to reduce your energy costs.
